Junior Data Migration Consultant

SNP Group are looking for a passionate individual to join our friendly UK team as part of a global organisation. The collaboration and support across the teams makes this a special place to work and offers variety as well as excellent career opportunities.

Our name is synonymous with innovative software and first-class consulting in the SAP industry. Our teams of experts, using our proprietary software, carry out complex data transformation projects to support our customers with their strategic goals through acquisitions, divestments, and other landscape changes or business process harmonisations.

The ideal candidate doesn't need to have direct SAP experience but must be able to **demonstrate experience in coding or data analysis** and have an **eagerness to learn** and grow quickly into the role.

Experience and Skills

- IT programming, data analytics or data management experience
- Drive, enthusiasm with a 'can-do' attitude
- Excellent written and oral communication skills and strong interpersonal skills that inspire confidence in you and the delivery of the project
- A strong problem solver with a tenacious attitude to seek out resolutions
- Strong technical skills

As a junior consultant, you will work alongside industry-leading specialists reporting directly to lead consultants and project managers within a small team. You will receive training on SNP's toolset and have a dedicated mentor to support your learning and progress within the organization. After training, you will be involved in simple data migration projects for UK and international SAP customers to improve your skillset.

This job presents an opportunity to join a thriving company with ambitious yet sustainable growth plans at an exciting time in its development. The company is focused on long-term customer relationships, quality of delivery, continuous improvement, and employee development. You will be challenged and supported to improve your knowledge and become a Senior Data Migration Consultant.
